E.4 Pole Line Construction on Private Property

E.4.1 Poles on private property to be used in serving an individual customer will be furnished by the Telephone Company to the customer at the cost of installation of each such pole, except that the Telephone Company will furnish as many as two poles without charge to the customer provided the poles furnished are used to carry main line circuits. Ownership of all such poles used in serving an individual customer is vested in the Telephone Company, and the cost of maintaining and replacing all such poles is assumed by the Telephone Company.

E.4.2 Poles on private property to be used as part of the standard distributing plan serving customers in general are furnished, maintained and owned by the Telephone Company, subject to such construction charges as may be applicable.

E.4.3 All circuits on poles on private property are furnished, owned and maintained by the Telephone Company.

E.5 Construction for Temporary Service

E.7 Special Types of Construction

E.8 Application of Charges

E.8.1 Construction charges are payable at the time application for service is placed or when the account is rendered. At the option of the Telephone Company, a deposit on construction charges may be required before the work is started.
